New EuroGrip Steering Control - www.lodgesons.co.uk

Lodgesons 'EuroGrip' User Instructions

Indicators

The indicators work in the same way as the vehicle's controls. A brief press will turn the indicator on for one to three flashes (not available on all vehicles). A longer press (half a second) will latch the indicator on until cancelled. Indicators can be cancelled by pressing the indicator button again or by pressing the cancel button (this varies from car to car). Indicators will self cancel on some car models.  *Indicator Cancel Button

Horn

Press to sound the horn.

Flash

A short press will flash the headlights. A long press will activate main beam

Dip/Main Lights

On some vehicles, this will operate main beam.
If you have '+ lights', press and hold to active the headlights.

Illumination

Press and hold the indicator cancel button for 5 seconds to turn the illumination on and off. The illumination will turn itself off after 25 minutes of keypad inactivity, and shortly after the vehicle ignition is switched off.

Battery

Your 'EuroGrip' system uses a quality 3 volt CR123A lithium non-rechargeable battery ONLY. Battery life is largely dependent upon usage of the illumination (as this uses more considerably more power than the functions alone), but at the minimum the battery should last approximately 110 hours of total illumination time.

Front Wipers

Up Button: Press once for intermittent/rain sensor, press a second time for low speed and press a third time for high speed.

Down Button: The reverse of the above applies. On some vehicles, if the wipers are on, a long press (2 seconds) will turn all wipers off. If the wipers are off, a short press will give a single wipe.

Front Washers

Press and hold to turn on the front washer. On many cars this will also activate the front wipers.

Rear Wipers & Washers

A short press turn the wiper on and off. Press and hold to turn on the rear washer and wiper.

Hazards

If the hazard option has been connected, press briefly three times to turn hazards on and off. This option is not available on all vehicles.

Note: Our kits are designed to operate as closely as possible to your vehicle's original controls. This means the functionality may vary across vehicle models.

Please take time to familiarise yourself with your system. If you have any questions about how to use it, don't hesitate to contact us.

Warranty

Your 'EuroGrip' system must only be installed by an accredited Lodgesons installer. The system is covered by a 'back to base' parts and labour warranty, providing you have registered your system via our website (www.lodgesons.co.uk/warranty-registration). All claims must be made via your installer. Conditions apply.
